THE FLAGSHIP

BUSINESS & BEYOND

FROM THE DESK OF THE MASTER PLANNER

“The vision for this project has been to truly embrace the notion that it’s the spaces that we create between the buildings that set this place apart. So it’s the green landscapes, the walking spaces, and the heritage street that are the heart of this project and what it tries to do is to promote social cohesion. The Flagship believes in giving back to nature. It gives back by providing acres of green space, places to take shade, places that help improve the air quality, places to play, places for enjoyment or simply to relax. What we are really going to create are these great set pieces.

Essentially a new piece of city that brings people together, people who are working, people who are shopping, or people who are enjoying hospitality, but bringing them together in such a way that we create a community.”
